EXPERIENCE

❖ **Data Analytics Trainee** [certificate](#) **MedTourEasy / Dec 2024 - Jan 2025**

- Selected as a Data Analytics Trainee at MedTourEasy, where I gained access to a curated **Coursera** focused on real-world data skills.
- Completed foundational courses such as:
 - Data, Data Everywhere–** [certificate](#) **issued by google / Dec-24**
 - Data-Driven Decision Making–**[certificate](#) **issued by google / Dec-24**
- Gained hands-on understanding of key concepts like **data collection, cleaning, visualization, and interpreting data for insights.**

SELECTED PROJECT

Interactive Registration Form with CAPTCHA Validation[Live Demo](#)

- A clean and **responsive registration form** built using HTML, Tailwind CSS, and JavaScript.
- Collects user details like **Full Name, Password, and Confirm Password** with built-in validation.
- Includes a **CAPTCHA** system for security to prevent automated submissions.
- The Refresh button lets users **generate a new CAPTCHA** easily.
- A simple, user-friendly design that demonstrates form validation and frontend interactivity.

Real Estate: Discover Your Dream Home with Us [Live Demo](#)

- Designed a **modern real estate website** with a bold hero section featuring a clear call-to-action (“Start Searching”) and a strong value proposition (“Discover your dream home”).
- Showcased core real estate services including **sales, rentals, property management, and investment**, giving users a clear overview of offerings.
- Integrated a **featured listings section** displaying property images, titles, prices, and short descriptions to engage potential buyers and renters.
- Added a **client testimonials section** to build trust and highlight customer satisfaction.
- Concluded with a **mission statement and call-to-action**, reinforcing the brand’s goal of helping users find their ideal property while maintaining a clean and responsive design.

Today's Focus – Task Management Web App [Live Demo](#)

- Designed a **minimalist and interactive web app** to help users **set and track 3 daily goals**.
- Features a **progress bar** that updates in real-time as tasks are completed.
- Displays **motivational quotes** to keep users inspired and focused throughout the day.
- Built with a **clean UI** to enhance **productivity** and **daily goal-setting**.

Rest Countries Api [Live Demo](#)

- Built a responsive web application that displays detailed country information (population, region, capital, etc.) by fetching data from a public REST countries API.
- Added a real-time search bar to allow users to quickly find a specific country by name, enhancing user experience and accessibility.
- Implemented a click-through detail view: when a user selects a country, the app shows extended information including its bordering countries, offering deeper geographical context.
- Used modern frontend technologies (e.g., HTML, CSS/Tailwind, JavaScript/React) to provide smooth interactions, filter results, and handle asynchronous API calls.

Language

English, Hindi, Telugu.
